### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 21 June 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

1. This action is in response to the Amendment in response to non-final office action, filed 21 June 2005.
2. Claims 1-17 remain pending.

***Drawings***

3. The drawings were received on 21 June 2005. These drawings are acceptable for examination proceedings.

***Specification***

4. The amendment to the specification by the applicant has been accepted. The specification is now in conformance and the objection has been withdrawn.

***Claim Rejections - 35 USC § 112***

5. The amendment to claims 1 and 4 by the applicant has been accepted. Claims 1-7 are now in conformance and the 112 rejection has been withdrawn.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Purnaveja et al. (U.S. 6,006,241), hereinafter referred to as Purnaveja.

Art Unit: 2142

8. Regarding claims 1, 8, 15, 16, and 17, Purnaveja discloses a plural media data synchronizing system which connects image source to network data obtained from a network, comprising:

an inserting unit which inserts into the image source an image marking including information that is used to display the network data synchronizing with displaying of the image source and is extracted from the image source (col. 2, lines 42-48 and col. 5, lines 43-45);

an image supplying unit which supplies the image-marked image source in which the image marking has been inserted by the inserting unit, via a predetermined medium (col. 4, lines 46-49);

an editing and integrating unit which receives the image source from the image supplying unit and performs at least one of editing of the received image source and integrating of the received image source, to produce image contents (col. 5, lines 43-45); and

a display unit which detects the image marking from the image contents, and displays the image contents and the network data synchronously based on synchronizing information obtained from the detected image marking (col. 4, lines 46-49 and col. 5, lines 46-53).

9. Regarding claims 2 and 9, in accordance with claims 1 and 8, respectively, Purnaveja discloses the system wherein the image supplying unit supplies the image source by using a plurality of media (col. 4, lines 9-22).

Art Unit: 2142

10. Regarding claims 3 and 10, in accordance with claims 1 and 8, respectively, Purnaveja discloses the system wherein the inserting unit (a) produces a feature file used for moving picture matching based on the image source (col. 5, lines 43-45), (b) inserts the image marking including a description about a location where the feature file is stored, into the image source (col. 5, lines 46-51), and (c) produces a synchronizing information script showing when the network data are displayed (col. 5, lines 46-53).

11. Regarding claims 4 and 11, in accordance with claims 3 and 10, respectively, Purnaveja discloses the system wherein the editing and integrating unit performs at least one of the editing and the integrating by using the feature file and the synchronizing information script (col. 5, lines 48-51).

12. Regarding claims 5 and 12, in accordance with claim 1 and 8, respectively, Purnaveja discloses the system wherein the image marking includes information used to access the network data based on a synchronizing timing of the image source (col. 7, lines 20-27).

13. Regarding claims 6 and 13, in accordance with claim 1 and 8, respectively, Purnaveja discloses the system wherein the inserting unit inserts the image marking into the image source for each medium by which the image source is supplied (col. 5, lines 43-45 and col. 7, lines 33-35).

14. Regarding claims 7 and 14, in accordance with claims 6 and 13, respectively, Purnaveja discloses the system wherein the image marking includes information used to access the network data based on a synchronizing timing of the image source, and information of the network data (col. 7, lines 20-27 and col. 6, lines 57-64).

***Response to Arguments***

15. Applicant's arguments filed 21 June 2005 have been fully considered but they are not persuasive. Applicant argues that Purnaveja does not disclose "the inserting unit which inserts into the image source an image marking including information that is used to display the network data synchronizing with displaying of the image source and which is extracted from the image source." The Examiner respectfully disagrees. Purnaveja discloses a user-friendly tool, a production station, (the inserting unit) which inserts the image marking in to the image source (see col. 5, lines 43-45). Purnaveja also teaches synchronization scripts including annotation streams for synchronizing the display of video streams with annotations, annotations being displayable events such as textual/graphical data in the form of HTML pages with Java applets for instance. This is the use of the image marking to display the network data synchronizing with displaying of the image source, which is extracted from the image source.

***Conclusion***

16. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2142

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
